AUTELSDK功能：

- 上层及底层的飞行控制
- 飞行数据实时回传
- 自主避障
- 相机和云台的全方位实时控制
- 获得Autel图传系统传回的高清影像
- 照片和视频的实时回传下载
- 支持任务：Dynamic Track, Viewpoint, Orbit, Smart Orbit , Gesture Control, Precision Flight ,Dual Stability, Waypoint Mission
- 电池和遥控器的状态信息获取及参数设置

AUTEL SDK Features:

- Fight control of the upper and infrastructure layers
- Real-time flight data transmission
- Autonomous obstacle avoidance
- Real-time and full control of camera and gimbal
- HD image feedback from Autel image transmission system
- Real-time upload and download of photos and videos
- Supported Misssions: Dynamic Track, Viewpoint, Orbit, Smart Orbit , Gesture Control, Precision Flight ,Dual Stability, Waypoint Mission
- The status and parameter settings of battery and remote controller
